Attach 3 - 9V batteries together in "series" (21 V D.C.)

Colloidal Silver Generator:

Materials Required:
- Distilled Water
- Sea Salt Solution
- 99.9 Pure Silver Rods (2)
- Glass
- 9 Volt Batteries (3)
- Wire Leads w/ Alligator Clips

Battery clips available at Radio Shack

Alligator clips to 99.9 Pure Silver Rods

21V D.C.

8 oz. Glass Distilled Water w/ 2 drops Sea Salt Water

Remove in approximately 10 minutes when water becomes cloudy.

Store in dark glass container at room temperature.

Clean silver rods w/ water and scrub pads after use.

Note: To purify drinking water, make stronger solution and filter out any darker particles before use.

Store in dark bottle at room temperature.

Apply approximately one tablespoon per gallon of water.

Shake water vigorously and let sit 5 minutes before drinking water.

Do not use plastic glass for making or storing colloidal silver.
